

### **Summary:**

- With over 3+ years of extensive experience in Web Application Design and Development, I have established myself as a proficient expert in leveraging Core Java and J2EE technologies. Throughout my career, I have embraced agile development processes.
- At the core of my technical skill set lies a deep understanding of Core Java and its application within the Spring Framework, encompassing Spring Core, Spring MVC, Spring JDBC, and SAP Hybris.
- My expertise extends beyond the basics, as I have successfully embraced advanced technologies like Spring Boot and Micro-services.
- As a highly self-motivated individual with a goal-oriented mindset, I thrive in collaborative environments, fostering seamless cooperation within teams and across departments. My average communication skills complement my ability to tackle complex problems efficiently.
- Dynamic and adaptive, I readily embrace change and continuously seek growth opportunities. My amiable nature allows me to build strong relationships with colleagues, enhancing overall team productivity and morale.

### **Technical Skills:**

- Programming Languages: [Java]
- Web Development: [HTML, CSS, JavaScript]
- Database Management: [Oracle]
- Frameworks: [Spring, Spring MVC, Spring-boot, Hibernate]
- Version Control: [Git, SVN]
- Cloud Platforms: [AWS]
- Methodologies: [Agile, Scrum]

### **Education:**

- [MCA] | [Biju Patnaik University Of Technology] | [2019-2022]

### **Work Experience:**

- [Software Engineer] | [Helson Software Solutions] | [June 2024 – Present]
- [Software Consultant] | [Skytech Commerce] | [October 2023 – June 2024]
- [Software Engineer] | [Lince Soft Solutions] | [August 2021 – October 2023]

### **Projects:**

#### **1. Hospitality Information System (HIS)**

Team Size: 13

Period: 25th Aug 2021 – 18th Oct 2023

Role: Developer

Technologies: Core Java, Spring MVC, Spring JDBC, Angular 7, Typescript, Oracle

Database 11g

#### **Description:**

The Hospitality Information System (HIS) project involved the development of a comprehensive hospital management system for a multi-disciplinary hospital with specialised treatment centres. This system aimed to automate various daily activities within the hospital,

ranging from patient registration to discharge. The project encompassed multiple modules such as Patient Registration, Ward Management, Outpatient (OP) Information, Inpatient (IP) Information, Pharmacy Management including incoming and outgoing stock details, and an Administration and Configuration module for user management and data configuration.

### **Roles & Responsibilities:**

During my involvement in the HIS project as a Developer, my responsibilities included:

- Developing REST endpoints: I was responsible for creating the RESTful API endpoints using Spring MVC framework, enabling seamless communication between the front-end and back-end components.
- Controller, Business, and DAO classes: I actively participated in designing and writing the controller, business logic, and Data Access Object (DAO) classes, ensuring the proper flow of data and business processes within the application.
- Jasper Report development: I contributed to the development of documents using Jasper Reports, a powerful reporting tool. This involved creating structured and visually appealing reports that presented critical information effectively.

## **2. LoanSphere Expedite**

Team: 11

Duration: 2nd Nov 2023 – 07h June 2024

Role: Consultant

Tech Stack: Core Java, Spring MVC, SAP HYBRIS, JSP, Typescript, Spring JDBC, MSSQL Server

### **Description:**

LoanSphere Expedite, a pivotal innovation, empowers Black Knight clients to seamlessly transmit documents for review and e-signatures. Recipients login, give consent, and access the Dashboard to view or sign the package. The LoanSphere Expedite Administrator Dashboard offers sender control, enabling transaction management, template mapping, and comprehensive package tracking.

### **Roles & Responsibilities:**

As a Developer in the LoanSphere Expedite project focusing on SAP Hybris:

3. Custom Module Development: Developed and customized SAP Hybris modules to meet specific business requirements, enhancing the platform's functionality.
4. API Integration: Integrated SAP Hybris with third-party services through RESTful APIs, ensuring seamless data exchange and workflow automation.
5. Commerce Customization: According the Hybris Commerce platform to support unique business processes, including product catalog management, order processing, and customer management.
6. Front-End Enhancements: Worked on the front-end interface using HTML5, CSS3, and Angular, ensuring the SAP Hybris storefront was responsive and user-friendly.

## **3. OLBB (Online Banking For Business)**

Team Size: 18

Duration: 25th Jul 2024 – Present

Role: Developer

Technologies: .NET Core, ASP.NET Core MVC, Microservices, Blazor/Angular, Entity Framework Core, and Oracle Managed Data Access.

**Description:**

OLBB, the Online Banking For Business platform, revolutionises banking solutions for businesses. This comprehensive online platform offers a range of payment services, enabling seamless transactions between banks. Modules like Interact e-transfer, Wire Payment, Digital Cheque services, and more cater to diverse business needs.

**Roles & Responsibilities:**

As a Developer in the OLBB project:

- Developing REST endpoints: I was responsible for creating the RESTful API endpoints using ASP.NET Core MVC framework, enabling seamless communication between the front-end and back-end components.
- Integrated Backend API: Linked frontend and backend seamlessly by integrating APIs, enabling full functionality across the screens.

**Declaration:**

I hereby declare that all the information stated above is true and correct to the best of my knowledge.
